

Florida Hospital Expansion

ORLANDO - The Florida Hospital Expansion, erected by ironworkers from Local 808 (Orlando), is a \$200 million plus project going into its third year. Over 928 tons of steel have been used so far. One of the focal points of this project features two pedestrian bridges that were set as “one pick” between buildings. The other focal point has to be the ICON Tower. Dixie Southern also provided design assistance on this feature.
